How to read this sample

The score describes data completeness and enrichment signals. It is not a measure of purchase intent or a prediction of campaign results. Meta Pixel status reflects the check at collection time.

Contact fields are retained in the delivery CSV

This public sample omits email addresses and phone numbers. Public availability varies by company; finding an email does not establish SMTP deliverability.

Personalization you can inspect

Two examples reproduced from the supplied CSV, with their recorded website evidence.

Thrifty Car Rental - Dubai Silicon Oasis

REVIEW STATUS: APPROVED

Review before delivery

The operator checks the evidence, edits the hook where needed and approves or rejects the record. The approved-only export carries that review status into the CSV.

Recorded excerpts are historical source snapshots; website content may change.
